

# LOCAL GAGLIARDO-NIRENBERG ESTIMATES FOR ELLIPTIC SYSTEMS

J. HOUNIE & T. PICON

We extend some global  $L^1$  estimates which are known in the case of the de Rham complex on  $\mathbb{R}^N$  to the setup of local  $L^1$  estimates for more general differential complexes, namely, those associated to involutive elliptic structures spanned by a family of linearly independent smooth complex vector fields
